

**Lots of thanks to the 2G class that made this website possible !
They have have been working since september to learn how to use
the content managing system named Joomla!.**

***Joomla! is an open source content management system platform
for publishing content on the World Wide Web and intranets as
well as a Model–view–controller (MVC) Web application
framework. It is written in PHP, stores data in MySQL and includes
features such as page caching, RSS feeds, printable
versions of pages, news flashes,
blogs
, polls, search, and support for language internationalization.
